OBJECTIVE

A highly motivated IT student and NPTEL Course Topper in 'The Joy of Computing using Python' seeking to leverage strong programming fundamentals, algorithmic thinking, and automated data processing skills during the 10-week online research internship under Prof. Sudarshan Iyengar at IIT Ropar.

EDUCATION

Degree / Examination	Institute / Board	Session	Score
B.Tech (Information Technology)	MIT Muzaffarpur	2025-29	8.45 CGPA
Senior Secondary (Class XII)	BSEB	2025	76%
Secondary (Class X)	CBSE	2023	90%

CERTIFICATION & ACHIEVEMENTS

- **NPTEL Course Topper (Elite + Gold)** - The Joy of Computing using Python (IIT Ropar)
  - Secured a top-tier final consolidated score on the national exam.
  - Ranked in the top percentage of nationwide candidates.
  - Digital Verification Certificate: dipankar-nptel-python

TECHNICAL SKILLS

- **Programming Language:** Python, C
- **Web Technologies:** HTML, CSS, JavaScript (Basic)
- **Tools & Environments:** VS Code and Spyder
- **Core Competencies:** Logic Automation, Problem Solving, Control Flows, Responsive Layouts

PROJECTS (NPTEL COURSEWORK)

Python Multi-Game Interactive Suite [Course Project]

- Architected a unified console-based application integrating classic games including **Snake & Ladder, Rock-Paper-Scissors, and an algorithmic Binary Search game**.
- Engineered a dynamic multi-mode architecture supporting both single-player (vs. randomized computer AI) and full local multi-player functionality.
- Implemented clean conditional routing networks to manage distinct user loops, turn-based state trackers, and automated win/loss board evaluations.
